15 candidate plans to help you choose the right 3–4 tiers for launch.

A premium dating experience built around meaningful connections.

How to use this document

These are concept options, not 15 plans to launch simultaneously. Each option is a candidate positioning, price point, or billing structure. Compare them, select 3–4 complementary plans, then test pricing and willingness to pay with real users.

Pricing note: INR prices below are illustrative starting hypotheses for an India-first launch, not market-validated recommendations. Confirm taxes, app-store fees, payment costs, refunds, renewal disclosures, and local legal requirements before launch.

Product principle: Core matching, messaging with existing matches, blocking, reporting, account deletion, and essential safety features should remain free. Paid plans should improve convenience, discovery, personalization, or optional

visibility—not sell safety or guarantee romantic outcomes.

Best for: Users who prefer a small initial commitment.

Included benefits

- Temporary access to selected Plus or Gold features

Best for: Users who want time to build connections.

Included benefits

- Gold-level benefits for the subscription term
- Lower effective monthly price than month-to-month

Single-use profile feature

■49–■99	Per use · test range

Best for: Users who want an occasional profile placement boost.

Included benefits

- One short, clearly timed discovery boost

Best for: Users drawn to deeper compatibility insights.

Included benefits

- Expanded report across shared values and preferences
- More personalized conversation starters

- Explanations of similarities and differences

Consideration: Do not market scores as scientifically proven or as predictions of relationship success.

11 · Maison Select

Curated discovery

■599–■899	Per month · test range

Best for: Users who prefer fewer, more relevant suggestions.

Included benefits

- A curated daily selection based on stated preferences
- Stronger controls for relationship intentions
- Saved profiles and a shortlist
- A slower-dating mode that pauses new recommendations

Consideration: Curation must be transparent and should not promise a specific number of compatible people.

Best for: Users who prefer meeting through shared activities.

Included benefits

- Browse eligible Maison-hosted or partner events

Best for: Users who want help moving from chat to a plan.

Included benefits

- Shared date idea lists
- Coordinate availability with mutual consent
- Save favourite public venues and activity ideas
- Date reminders and opt-in check-ins

Consideration: Safety features should remain free; paid features must be convenience extras.

---

14 · Maison Duo

Two-person shared perks

Best for: A later-stage option for users who both opt into a shared experience.

Included benefits

- Early access to selected beta features
- Special profile themes or cosmetic customization
- Feedback sessions and product community access

Consideration: Limit the offer honestly; don't imply that founder status guarantees better matches or special treatment in safety moderation.

Comparison: which plans overlap?

You should not launch every option below as a separate subscription. Some are billing periods or one-time purchases rather than distinct tiers.

Recommended shortlist: 4 launch plans

- **Maison Free — ■0:** an attractive, complete entry experience with essential safety and core matching.
- **Maison Plus — test ■199–■299/month:** accessible premium discovery and expanded controls.
- **Maison Gold — test ■399–■599/month:** Likes You, more discovery flexibility, and limited boosts.
- **Maison Platinum — test ■799–■999/month:** the complete optional premium toolkit for frequent users.

Alternative if Chemistry is the brand's strongest differentiator: replace Plus or Platinum with Maison Chemistry+ and test whether users value deeper reports enough to pay for them.

Pricing and launch validation checklist

- Interview users about which features they value and what they would realistically pay.
- Test two or three price points with clear, identical feature definitions.
- Measure paid conversion, refunds, cancellations, retention, and whether free users can still have a good experience.
- Calculate net revenue after applicable taxes, app-store commissions, payment processing, promotions, and support costs.
- Display renewal frequency, total charge, trial conditions, and cancellation instructions before purchase.
- Do not sell guaranteed matches, verified safety, or access to basic blocking and reporting.
- Use local legal and app-store review before enabling recurring billing.
