Onboarding Questions & Compatibility Quiz

A structured question bank for a more thoughtful dating experience.

LESS SWIPING. MORE MEANINGFUL CONNECTIONS.

Purpose

This document contains the first-time onboarding questions and the 24-question Maison Compatibility Quiz. It is designed for product design, engineering, and content implementation.

Recommended experience

Keep onboarding short and welcoming. Ask essential questions first, make sensitive questions optional, and invite users to complete the deeper compatibility quiz after creating their profile.

- ■ Respect for personal boundaries
- ■ Similar views on children and family
- ■ Compatible lifestyle or substance-use preferences
- ■ Respect for cultural or religious values
- ■ None selected / I'd rather discuss these later

03 Matching & Scoring Guidance

Suggested starting weights

Dimension	Initial weight
Relationship intentions	25%
Values and boundaries	20%
Communication and emotional connection	20%
Lifestyle and daily habits	15%
Personality and social preferences	10%
Interests and dating style	10%

Important implementation rules

- Treat these weights as initial hypotheses to test, not scientifically validated predictors of relationship success.
- Apply user-selected hard dealbreakers as filters before calculating an overall score.
- Do not let a high aggregate score conceal a fundamental mismatch in relationship intentions.
- Allow users to skip optional questions and update answers later.
- If too few answers are available, show a preliminary report rather than false precision.
- Explain the main factors behind a score and avoid presenting it as a prediction of relationship success.
- Protect sensitive responses; do not expose private answers to a match without explicit user consent.
- Use stable question IDs, answer values, quiz versioning, and clear retention/deletion controls.

Product principle

Maison should help people understand what they share, explore where they differ, and start better conversations. The Chemistry score is a conversation aid—not a guarantee that two people are destined for each other.
